FEEDING RECOMMENDATIONS

- Consult a Feedtek animal nutritionist if alternative ingredients are available
- Replace up to 10% of the grain meal / hominy chop with molasses meal or -syrup or Calori 3000 if preferred
- Replace 100 kg grain meal / hominy chop with any oilcake meal for young, late pregnant and lactating small stock
- After adaptation the best regulated intakes are obtained when licks are supplied unrestricted
- Salt inclusion rates are guidelines - may differ according to pasture type and specific conditions
- Supply licks according to stage of reproduction, quality of grazing and body condition of animals
- Good quality, unrestricted grazing and / or roughage must be available at all times together with these licks
- These licks contain an ionophore - do not feed to horses or game
